Figure 5.7: Seasonal variation of climatic changes over Southeast Asia after deforestation (areal average from 15°S to 20°N and from 95°E to 150°E): (a) total precipitation (mm month\(^{-1}\)), (b) total evapotranspiration (mm month\(^{-1}\)), (c) moisture divergence (mm month\(^{-1}\)), (d) surface net radiation (W m\(^{-2}\)), (e) sensible heat flux (W m\(^{-2}\)), (f) surface air temperature (K). [From Zhang et al.(1996a)]
