

Table 3.18: Summary of correlations for winter (DJF). Average magnitudes of significant (0.10 level) and stable results for all stations appended with the average sign, marked with a W (C, E) if there are more valid correlations in the western basin (c, e) than the centre (e, w) or east (w, c). Values shown in italic if >10% of stations give significant and stable results, bold italic if > 20%, and bold if > 30%.
