Table 3.4: Stations where less than 90 % of the data contain humidity values by 10 °C bin and year. Continued on next page. Percentages of T data with simultaneous T_{dw} reported are shown in parentheses. There must be at least 10 observations per bin for the test to be carried out. Station WMO IDs are substituted with letters where Ga is 702220, Th is 042020, Ki is 783970, Pa is 723710, Gl is 837460, Sv is 284400, Ks is 637080, Gi is 726650, Co is 711200, Dh is 404160 and Tu is 607150.
